

## PAC Brand Tools

### Manual Tools for Plastic Strapping

PAC brand tools are tough, durable, and priced very competitively, making them an exceptional value. The PST34 is an industry standard and is the preferred tool for regular duty applications. The PST-HD is a heavy-duty cast tool for both polypropylene and polyester, and the SJ series tools are a cost effective alternative for high strength polyester. All PAC brand tools are covered by a 30 day warranty and are backed by a complete parts inventory and our service department.
